EcoDataNet | ESPACIO DE DATOS

FICHA DE CONJUNTO DE DATOS

Convenios y acuerdos marco con condiciones, vigencia y obligaciones

Conjunto de datos publicado por la **Oficina de Asignación UC** en el catálogo federado del espacio de datos EcoDataNet.

PROVEEDOR DE DATOS **Oficina de Asignación UC**	IDENTIFICADOR DEL ASSET **`Agreements`**
PARTICIPANT ID **`eco_uc_ofiasignacion`**	CONECTOR **`ofiasignacion_uc`**
VERSIÓN · FORMATO **1.0 · JSON Array**	VOLUMEN · REGISTROS **37,1 KB · 63 filas**
FECHA DE EXTRACCIÓN **16/09/2026 · 07:15**	CLASIFICACIÓN DE USO **Restringido · Fin comercial**

Este documento describe el conjunto de datos, las condiciones de uso asociadas a su política ODRL, la estructura de sus campos y su contenido íntegro. Se emite como documentación de acompañamiento para el intercambio de datos entre participantes del espacio de datos.

01 Identificación del conjunto de datos

El conjunto de datos recoge los convenios y acuerdos marco suscritos entre los SCRAP (Sistemas Colectivos de Responsabilidad Ampliada del Productor) y las entidades públicas locales, incluyendo su ámbito territorial, los flujos de residuo cubiertos, el modelo de tarificación aplicable y el periodo de vigencia de cada acuerdo.

Título	Convenios y acuerdos marco con condiciones, vigencia y obligaciones
Proveedor	Oficina de Asignación UC — `eco_uc_ofiasignacion`
Conector origen	`ofiasignacion_uc`
Asset ID / Versión	`Agreements` · 1.0
Tipo de contenido	`application/json`
Estructura	JSON Array de objetos planos — 18 atributos por registro
Volumen	37,1 KB · 63 filas · 25 acuerdos únicos
Cobertura temporal	Convenios con entrada en vigor a 28/11/2025; vencimientos hasta 28/11/2026
Cobertura territorial	5 comunidades autónomas · 5 entidades locales
Fecha de extracción	16/09/2026, 07:15 (CEST)

> **Nota sobre la granularidad del fichero.** El fichero entregado contiene **63 filas** que corresponden a **25 convenios únicos**: cada acuerdo aparece repetido entre 2 y 3 veces como resultado de la expansión de relaciones en el sistema de origen. Los registros duplicados son idénticos en los 18 atributos. En el apartado 5 de esta ficha el análisis se realiza sobre los acuerdos únicos; el apartado 6 y el anexo B reproducen respectivamente el detalle deduplicado y el contenido íntegro tal cual fue recibido.

02 Condiciones de uso y política de acceso

El acceso al conjunto de datos está gobernado por la política ODRL publicada junto al asset en el catálogo. La política determina quién puede consumir los datos, con qué finalidad y qué usos quedan expresamente excluidos.

PERMISOS

Use — **Participant** `IsA` `eco_uc_scrapa`, `eco_uc_scrapb`

El uso queda restringido a los participantes identificados. Cualquier otro participante del espacio de datos verá el asset en el catálogo, pero su negociación de contrato será rechazada.

Use — **Purpose** `Eq` `commercial`

El tratamiento de los datos debe declararse y realizarse con finalidad comercial. Usos con finalidad distinta quedan fuera del ámbito del contrato.

PROHIBICIONES

Distribute — **Prohibida la redistribución**

El consumidor no puede poner los datos a disposición de terceros, ni republicarlos en su propio catálogo o en cualquier otro canal, en todo o en parte.

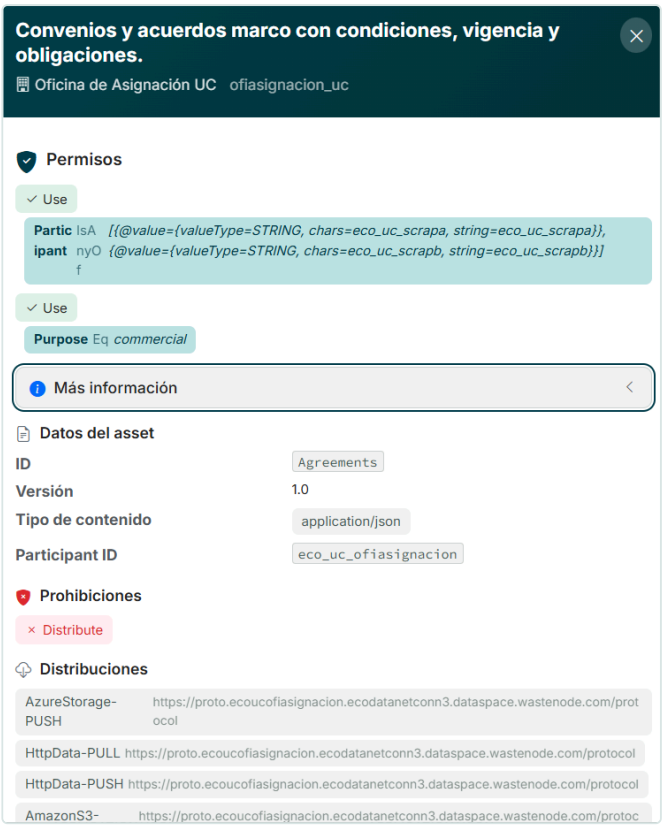

Figura 1. Ficha del asset en el catálogo federado de EcoDataNet: permisos, restricciones de participante y finalidad, prohibiciones y distribuciones publicadas.

Distribuciones disponibles

El asset se ofrece a través de cuatro formatos de transferencia sobre el mismo endpoint de protocolo del conector proveedor:

TIPO DE DISTRIBUCIÓN	ENDPOINT DEL CONECTOR
`AzureStorage-PUSH`	`https://proto.ecoucofiasignacion.ecodatanetconn3.dataspace.wastenode.com/protocol`
`HttpData-PULL`	`https://proto.ecoucofiasignacion.ecodatanetconn3.dataspace.wastenode.com/protocol`
`HttpData-PUSH`	`https://proto.ecoucofiasignacion.ecodatanetconn3.dataspace.wastenode.com/protocol`
`AmazonS3-PUSH`	`https://proto.ecoucofiasignacion.ecodatanetconn3.dataspace.wastenode.com/protocol`

03 Trazabilidad del intercambio

La obtención de los datos descritos en esta ficha se realizó mediante el flujo estándar del espacio de datos: negociación de contrato conforme a la política publicada, transferencia de datos y descarga por parte del conector consumidor. Ambos procesos finalizaron correctamente.

Negociación de contrato	Finalizada — Solicitada → Oferta recibida → Aceptada → Acordada → Verificada → Finalizada
ID de negociación	`9d5b02b0-3c9d-4db2-b030-35852afa81c8`
Transferencia de datos	Completada — Iniciada → Solicitada → En curso → Completada
ID de transferencia	`99257d1d-8f39-46c7-9915-1741c17a20da`
Resultado de la descarga	Datos recibidos correctamente · `application/json` · 37,1 KB

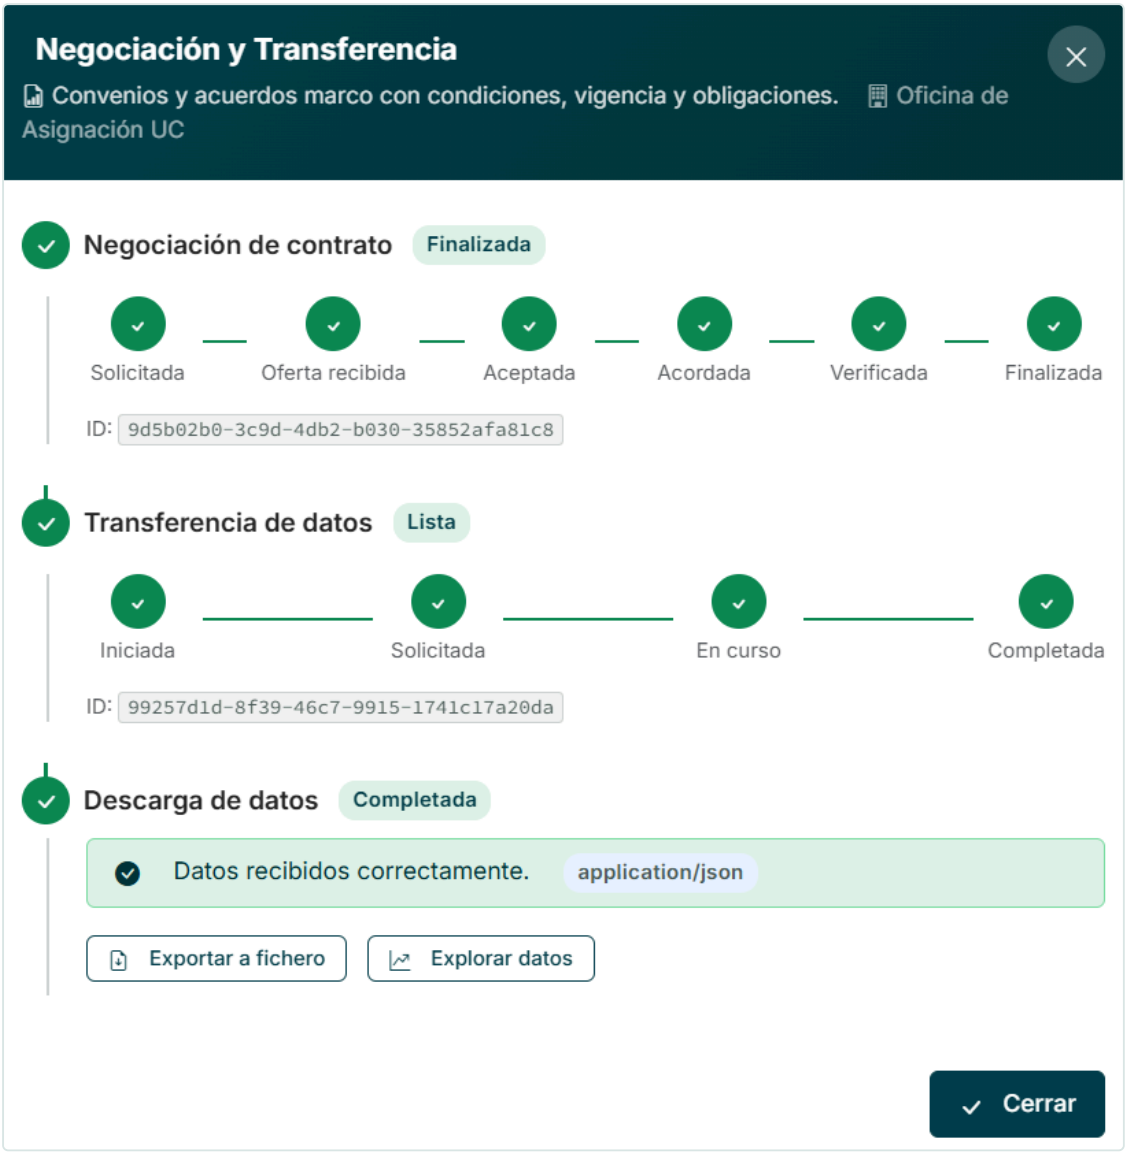

Figura 2. Ciclo completo de negociación de contrato, transferencia y descarga de datos, con los identificadores de negociación y de transferencia que permiten auditar el intercambio.

04 Estructura y diccionario de campos

Cada elemento del array es un objeto plano con los 18 atributos que se describen a continuación. No existen estructuras anidadas, con la salvedad del campo `TariffRulesJson`, que contiene un objeto JSON serializado como cadena de texto.

CAMPO	TIPO	DESCRIPCIÓN	EJEMPLO	NULO
OwnerId	string (GUID)	Identificador del titular (tenant) propietario del registro en el sistema origen.	0168f029-6dd2-…-fc8dcc0819ab	No
AgreementNumber	string	Código único del convenio marco. Clave de negocio del registro.	AGR-2026-0001	No
Status	enum	Estado del convenio: `Active`, `Expired` o `Draft`.	Active	No
EffectiveFrom	date (dd/MM/yyyy)	Fecha de inicio de vigencia del convenio.	28/11/2025	No
EffectiveTo	date | null	Fecha de fin de vigencia. `null` indica vigencia indefinida.	28/11/2026	Sí
ScrapName	string	Denominación del SCRAP (Sistema Colectivo de Responsabilidad Ampliada del Productor) firmante.	EcoEnvases SCRAP	No
PublicEntityName	string	Entidad pública local firmante del convenio.	Ayuntamiento de Zaragoza	No
PublicEntityNationalId	string	NIF/CIF de la entidad pública.	P00000001	No
CoordinatorName	string	Entidad coordinadora responsable del seguimiento del convenio.	Coordinador Demo COORD-01	No
CoordinatorNationalId	string	CIF de la entidad coordinadora.	G1100001	No
WasteStream	string	Flujo de residuo cubierto por el convenio.	Envases	No
SubStream	string	Subflujo material dentro del flujo principal.	Plástico	No
AutonomousCommunity	string	Comunidad autónoma en la que aplica el convenio.	Aragón	No
ProvinceCode	string | null	Código INE de provincia. No informado en esta entrega.	null	Sí
MunicipalityCode	string | null	Código INE de municipio. No informado en esta entrega.	null	Sí
TariffModelType	enum	Modelo de tarificación: `PorPeso` o `PorUnidad`.	PorPeso	No
Currency	string (ISO 4217)	Moneda en la que se expresan las tarifas.	EUR	No
TariffRulesJson	string (JSON)	Reglas tarifarias serializadas: `lerCode` (código LER del residuo), `pricePerKg` (€/kg) y `minWeight` (kg mínimos facturables).	{"lerCode":"150101", "pricePerKg":0.15, "minWeight":1000}	No

Ejemplo de registro

```
{
  "OwnerId": "0168f029-6dd2-4ebf-9cf1-fc8dcc0819ab",
  "AgreementNumber": "AGR-2026-0001",
  "Status": "Active",
  "EffectiveFrom": "28/11/2025",
  "EffectiveTo": null,
  "ScrapName": "EcoEnvases SCRAP",
  "PublicEntityName": "Ayuntamiento de Zaragoza",
  "PublicEntityNationalId": "P00000001",
  "CoordinatorName": "Coordinador Demo COORD-01",
  "CoordinatorNationalId": "G1100001",
  "WasteStream": "Envases",
  "SubStream": "Plástico",
  "AutonomousCommunity": "Aragón",
  "ProvinceCode": null,
  "MunicipalityCode": null,
  "TariffModelType": "PorPeso",
  "Currency": "EUR",
  "TariffRulesJson": "{\"lerCode\":\"150101\",\"pricePerKg\":0.15,\"minWeight\":1000}"
}
```

Observaciones de calidad del dato.

- Los campos `ProvinceCode` y `MunicipalityCode` están a `null` en la totalidad de los registros: el ámbito territorial solo se puede resolver a nivel de comunidad autónoma y de entidad local firmante.
- Las fechas se entregan como cadena en formato `dd/MM/yyyy`, no como tipo fecha ISO-8601; requieren conversión explícita en el proceso de carga.
- Los parámetros económicos `pricePerKg` (0,15) y `minWeight` (1.000) son idénticos en los 25 acuerdos, lo que es coherente con un conjunto de datos de demostración; el único parámetro que varía es `lerCode`.
- Un mismo `AgreementNumber` se repite en varias filas. La clave debe deduplicarse antes de cualquier agregación para no sobrecontar.
- La combinación `WasteStream` / `SubStream` no siempre es coherente con la descripción oficial del `lerCode` asociado: por ejemplo, los acuerdos de flujo *Envases* con subflujo *Plástico* llevan el código 150101 (envases de papel y cartón) y los de flujo *Voluminosos* / *Plástico* llevan el 150103 (envases de madera). Conviene validar esta correspondencia con el proveedor antes de explotar el campo.

170405	Hierro y acero	Metales	5

Lectura de conjunto. El conjunto describe una malla completa y regular: cada uno de los 5 SCRAP mantiene un convenio con cada una de las 5 entidades locales, resultando 25 acuerdos. Todos ellos arrancan el 28/11/2025. Los 20 convenios vigentes carecen de fecha de fin (vigencia indefinida), mientras que los 5 restantes —los correspondientes a **MetalCiclo SCRAP**— tienen vencimiento a 28/11/2026 y se reparten entre expirados y borradores.

06 Detalle de los acuerdos

Relación completa de los 25 convenios únicos contenidos en el conjunto de datos. Todos comparten los mismos parámetros económicos: **0,15 €/kg** con un mínimo facturable de **1.000 kg**, en euros (EUR), y la misma entidad coordinadora (**Coordinador Demo COORD-01**, CIF `G1100001`).

07 Explotación de los datos recibidos

Una vez completada la descarga, el visor de datos del conector permite inspeccionar el contenido recibido, personalizar el layout de presentación y exportarlo a otros formatos (JSON crudo, XLSX o PDF) sin salir del entorno del espacio de datos.

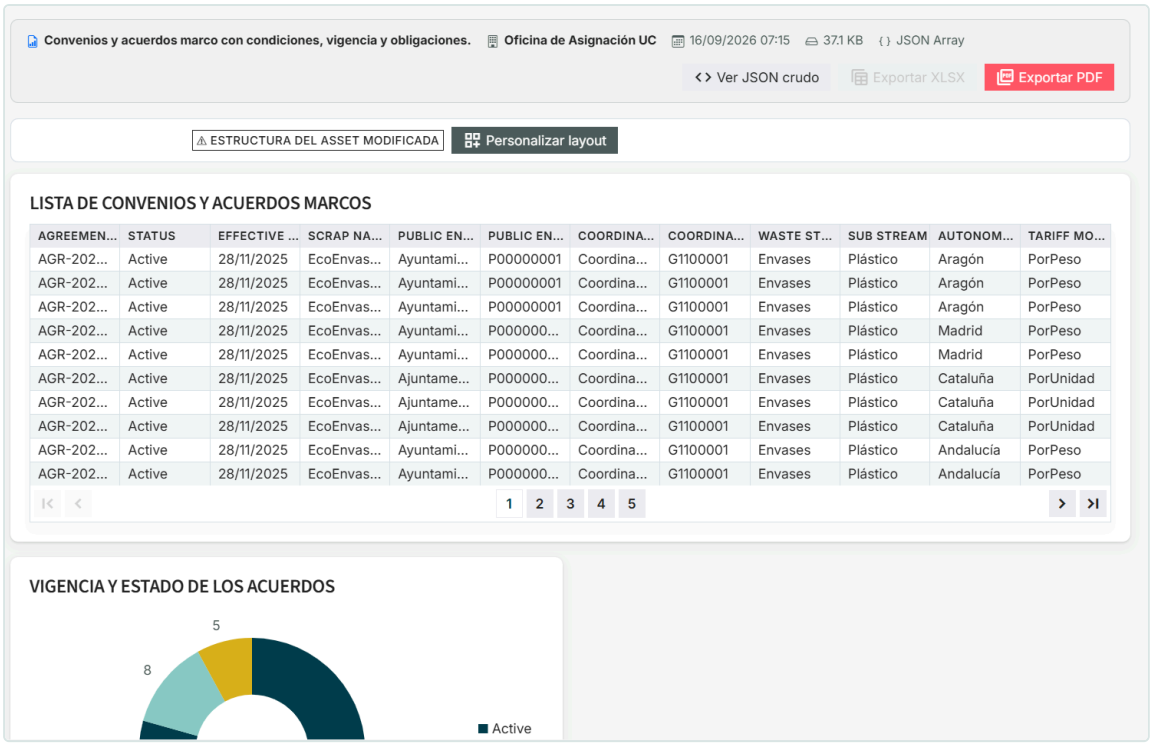

Figura 3. Visor de datos del conector: tabla paginada con los 63 registros recibidos y distribución por estado de vigencia. El aviso *«estructura del asset modificada»* indica que el esquema recibido difiere del layout guardado previamente para este asset.

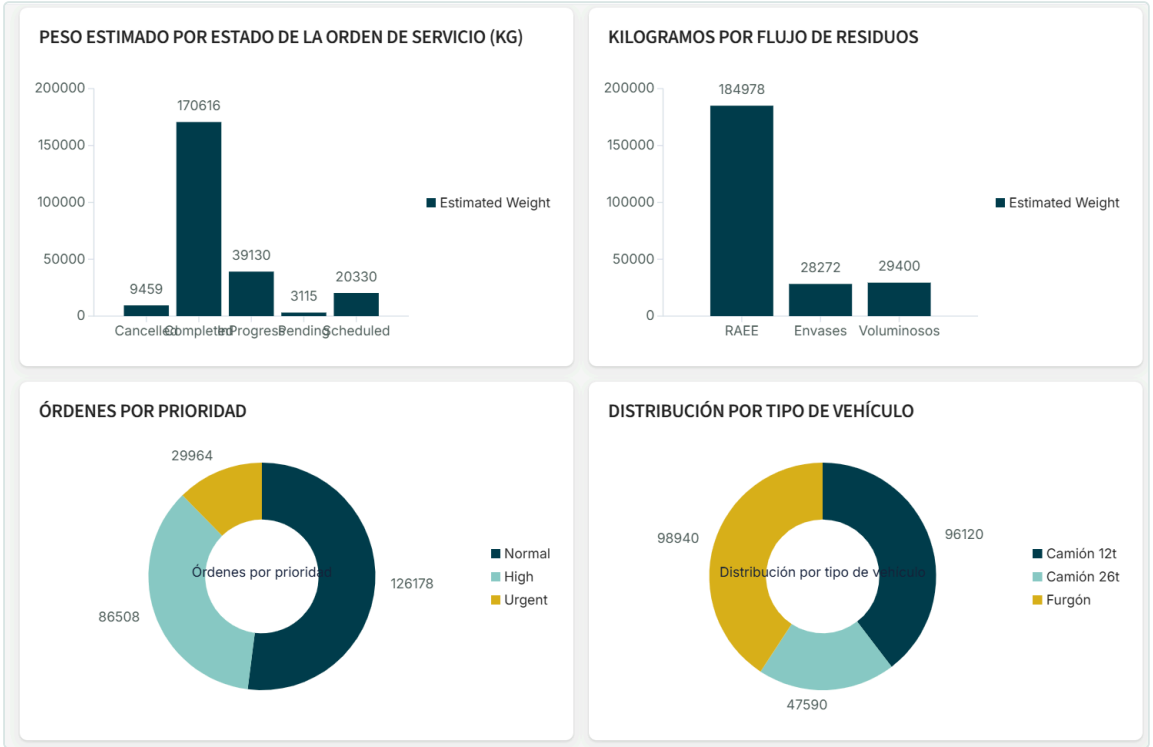

Figura 4. Panel analítico del visor sobre datos operativos del espacio (órdenes de servicio): peso estimado por estado de la orden, kilogramos por flujo de residuo, órdenes por prioridad y distribución por tipo de vehículo. Se incluye como ilustración de las capacidades de explotación disponibles sobre los conjuntos de datos consumidos.

A · Anexo A · Esquema del conjunto de datos

Representación del contrato de datos en notación de esquema, para su uso en procesos de validación e integración.
